

Prince Tiwari

Senior Frontend Developer

📞 +91 9340824001 | ✉ princevuejs@gmail.com | 📍 India

Profile Summary

Accomplished Senior Frontend Developer with 5+ years of experience architecting and designing highly responsive, intuitive, and high-performance web applications. Proven expertise in the **Vue.js ecosystem**, specializing in building reusable component libraries, optimizing single-page application (SPA) performance, and leading seamless migrations to modern build tools. Adept at transforming complex UI/UX designs into scalable, pixel-perfect code while ensuring rigid cross-platform and mobile responsiveness.

Technical Skills

- **Core Frameworks & Libraries:** Vue.js (Vue 2 & Vue 3 Composition API), Nuxt.js, Pinia, Vuex, JavaScript (ES6+), jQuery
- **UI & Design Engineering:** HTML5, CSS3, SASS/SCSS, Bootstrap (3/4), Responsive Web Design, Adobe Photoshop CS6
- **Build Tools & Workflows:** Vite, Git
- **Integration & APIs:** RESTful APIs, GraphQL, WebSockets (Socket.io), WebRTC, PayPal SDK
- **Databases & Tools:** MySQL, Visual Studio, Postman

Professional Experience & Key Projects

Lymphomap | Senior Frontend Developer

Jan 2020 – Present

Project Description: An AI and Machine Learning-powered cloud digital health ecosystem and virtual hospital platform dedicated to advanced cancer research, serious illness treatment, and virtual laboratory collaboration.

- **Vue 3 Migration:** Leading the comprehensive technical migration of the portal codebase from Vue 2 to **Vue 3**, leveraging **Vite** to significantly accelerate development workflows and optimize build-time efficiency.

- **Real-time Infrastructure:** Utilized **WebRTC** and **WebSockets** to support real-time communication channels and virtual data streaming within the cloud health ecosystem.
- **Cross-Browser Optimization:** Rigorously tested, debugged, and maintained UI stability across desktop browsers (Chrome, Opera) and mobile viewports to ensure seamless accessibility.
- **API Management:** Managed frontend data structures to consume complex, machine-learning-driven RESTful APIs cleanly.
- *Technology Stack:* Vue.js (Vue 2/3), Vite, WebRTC, WebSockets, SASS, Bootstrap, HTML, JavaScript (ES6+)

Oddvega | Frontend Developer

Sept 2021 – Dec 2022

Project Description: An AI-driven social learning ecosystem combining e-learning, gamification, and e-commerce to incentivize and reward educational and constructive social activities.

- **Modular Architecture:** Designed and built critical, reusable UI components for user dashboards, including interactive balance tracking and material reward cards.
- **State Management:** Developed and optimized centralized state management using **Vuex** to handle fluid gamification logic, real-time reward updates, and user progress metrics.
- **Performance Tuning:** Monitored and refactored core frontend assets, minimizing layout shifts and optimizing asset delivery for enhanced user engagement.
- *Technology Stack:* Vue.js, Vuex, Bootstrap, SASS, HTML, JavaScript (ES6), RESTful APIs

Quizzort | Frontend Developer

Nov 2019 – Jan 2020

Project Description: An innovative interactive education platform featuring a robust quiz builder tool, online test assessments, and educational mini-games.

- **Interactive Tooling:** Engineered a dynamic quiz builder interface allowing educators to seamlessly generate customized exams and interactive tests.

- **State Integrity:** Maintained local and global UI states to ensure real-time scoring accuracy and strict responsiveness during active user assessments.
- *Technology Stack:* Vue.js, Bootstrap, HTML5, CSS3, JavaScript (ES6+), RESTful APIs

Wallmikki | Frontend Developer

Sept 2018 – Oct 2019

Project Description: An automated, AI-powered image editing web application engineered to instantly isolate and remove backgrounds from user-uploaded images.

- **Asynchronous UX:** Created smooth, highly interactive file-uploading interfaces with asynchronous progress states handling image processing.
- **Pixel-Perfect Execution:** Translated advanced image-editing feature designs into fully responsive components using modern CSS layouts and clean ES6 syntax.
- *Technology Stack:* Vue.js, Bootstrap, HTML5, CSS3, JavaScript (ES6+), RESTful APIs

Core Roles & Responsibilities

- **Component Engineering:** Developed robust, clean, and highly maintainable user interface components following standard Vue.js reactive paradigms.
- **Cross-Functional Collaboration:** Partnered closely with backend developers, UI/UX designers, and teams across different infrastructure layers to coordinate integration efforts and API contracts.
- **Code Quality & Optimization:** Reviewed application requirements and interface technical briefs to guarantee structural adherence, web performance standards, and user experience optimization.

Education

- **Multimedia Diploma**

Virtual Voyage (Indore) | *Graduated: 2015*
